topic CSS Selectors

cues

3 farklı
implement
edebiliriz.

notes

Element Selector

```
h2{  
  color: red;  
}
```

Class Selector

```
<h2 class="red-text">Red</h2>
```

```
.red-text{ color : red; }
```

ID Selector : Tek bir tane attribute uygulanabilir

```
<h2 id="main">Red</h2>
```

```
#main { color: red; }
```

Attribute Selector

```
<p draggable="true">Drag me</p>
```

```
p[draggable] { color : red; }
```

Universal Selector

```
*{  
  color : red;  
}
```

summary

Biraz zorlandım. Belki tekrar gözden geçirmem gerekebilir.
